

What is Data Science?

Data Science is an interdisciplinary field that uses scientific methods, algorithms and systems to extract knowledge and insights from structured and unstructured data.

DATA SCIENCE PROCESS

From Raw Data to Valuable Insights

GOAL

To extract meaningful information from data and use it to make better decisions and predictions.

KEY POINTS

- ★ Data drives decisions
- ★ Quality data → Quality insights
- ★ Iterative process
- ★ Domain knowledge is important
- ★ Ethics & Privacy must be considered.

Data Science is an iterative process. We may go back to any step as per the requirement.

"Data is the new oil, but insight is the combustion engine."
